**Type of Request :**

Freedom Of Information

**Requestor Category :**

Private Sector Company

**Officer Notes :****Full Description :**

We are currently being incubated as part of Jaguar Land Rover's tech accelerator programme. We are in the process of building an algorithm for our mobile app called Hazrd that requires real time and historical data to help make roads safer for all drivers, mainly by enhancing existing GPS navigation systems. We would be very interested in creating a partnership with yourselves to receive data such as :

- Reports and status from lighting conditions, snow and ice, road obstructions, potholes, drainage problems on roads and puddles, flooding
- Current, planned and unplanned roadworks
- Live incidents
- Traffic signs
- Road closures
- Road surface status

A partnership would help us to create a reliable algorithm that produces real time hotspots and we are hoping that this is information in which you would be willing to share with us.

Do you have the information stated in the above bullet points readily available?

If this is the case then would it be possible for us to gain access to it?

What is the format ? eg XML, JSON

Can it be provided real time?

If some or none of the data is available for us what is the process or requirements to getting it in the future?

Summary Created :- 06 December
