Information to support submission of 'Enforcement Notice' Document

It goes to the issue of the need for Traveller sites, in that it is a further example of an unauthorised development that has arisen in the area which discloses a need for a further 6 pitches. Although this site was in existence at the time of the examination the LPA did not bring it to the attention of the parties or to the Inspector, despite being aware of it themselves. In any new GTAA sites including this one would be subject to thorough assessment and thereby help to establish what the level of need for sites in Newark actually is today, rather than relying on a flawed, out-dated assessment as currently proposed by the LPA.
